### **Summary**

With a Master's Degree in Mechanics and Mathematics I have started my career as a Software Engineer.

I have then pursued in CEO roles where I was leading all the departments of telecommunications and food processing businesses. My companies created quality products, ensured remarkable customer satisfaction and a high level of production efficiency. In parallel, I launched a wholesale business and continued working in the company as an adviser for Financial and Economic matters.

Meanwhile, I decided to remember my first profession and discovered a new direction for myself - creating custom websites, ensuring their quality and service as a freelancer. I am highly motivated to utilise my rich experience and skills in the new role in the UK.
